ABOUT ME

Front-End Developer with 2+ years of building responsive web applications using HTML5, CSS3, JavaScript, and Bootstrap. Currently leading a full-stack Student Records Management System project while completing my BS in Information Technology degree. I help teams deliver quality user interfaces through both development and QA testing experience. I'm Eager to learn and experience new challenges.

EDUCATION

Bachelor of Science in Information Technology (expected 2027)

University of Asia & The Pacific | 2023 - Present

Relevant Coursework: Web Development, Software Engineering, Database Systems

Capstone Project: Leading development of Student Records Management System using Java Spring Boot and MySQL

Senior High School Diploma

CIIT Senior High School, Inc. | 2021 - 2023

ACHIEVEMENTS

- Leading development of a Student Records Management System for Capstone Project (serving 200+ students, managing enrollment, grades, and attendance records)

EXPERIENCE

[Ed-Firm Inc.] – Front-End Developer (Commission) – [Taytay, Rizal, Philippines]

Sep 2022 – Sep 2022

- Built a responsive internet service redirection landing page using HTML, CSS, and JavaScript with adaptive design for mobile and desktop.
- Collaborated directly with the client to gather functional requirements, ensuring a user-friendly layout that clearly shows account billing status.

[Student Records Management System (SRMS) Project] – Lead Developer – [Pasig City, Ortigas]

Jan 2026 – Present

- Developing a full-stack web application with CSS and Bootstrap front-end, integrating Java Spring Boot APIs and MySQL 8 database.
- Wrote functional testing cases to validate input fields and form submissions, tracking bug rate improvements.
- Collaborated directly with client stakeholders to gather requirements and deliver functional specifications on schedule.
