ABOUT ME

Front-End Developer with 2+ years of experience building responsive web applications using HTML5, CSS3, JavaScript, and Bootstrap. Currently pursuing a BS in Information Technology while serving as Lead Developer for a full-stack Student Records Management System, leveraging AI-assisted coding to maximize development velocity. Skilled in bridging the gap between clean UI development and rigorous QA testing to deliver high-quality, user-centric software.

EDUCATION

Bachelor of Science in Information Technology (expected 2027)

University of Asia & The Pacific | 2023 - Present

Relevant Coursework: Web Development, Software Engineering, Database Systems

Senior High School Diploma

CIIT Senior High School, Inc. | 2021 - 2023

EXPERIENCE

[Student Records Management System (SRMS) Capstone Project] – Lead Developer – [Pasig City, Ortigas]

Jan 2026 – Present

- Accelerated full-stack development lifecycles by leveraging agentic workflows via Claude Code and Antigravity IDE to architect Java Spring Boot REST APIs, a MySQL 8 database schema, and a Bootstrap front-end.
- Automated code verification and regression testing by prompting Claude Code to programmatically generate and execute comprehensive JUnit test suites.
- Engineered core modules handling data ingestion for 200+ active student profiles, managing critical workflows for enrollment, real-time grading, and attendance tracking.
- Collaborated directly with client stakeholders to gather requirements and deliver functional specifications on schedule.
- Conducted rigorous manual exploratory testing across the front-end to identify UI bugs and verify that visual components seamlessly align with client design requirements.

[Ed-Firm Inc.] – Front-End Developer (Commission) – [Taytay, Rizal, Philippines]

Sep 2022 – Sep 2022

- Built a responsive internet service redirection landing page using HTML, CSS, and JavaScript with adaptive design for mobile and desktop.
- Collaborated directly with the client to gather functional requirements, ensuring a user-friendly layout that clearly shows account billing status.

SKILLS

Frontend Technologies: HTML5, CSS3, JavaScript, Bootstrap 5, Responsive & Mobile-first Design.

Backend & Database: Java, Spring Boot, MySQL 8, RESTful APIs.

AI & Agentic Engineering: Claude Code, Antigravity IDE, AI-Assisted Prototyping.

Testing & Quality Assurance: JUnit Automation, Functional Testing, Manual UI Validation, Component Testing.

Development Tools: Git, GitHub, VS Code.

Methodologies: Agile, Scrum Fundamentals
